

## Marilyn Golden

In September 2021, we lost Marilyn Golden, a comrade for many years. She worked for the Disability Rights Education and Defense Fund up in Northern California. But she sustained us in Southern California, providing essential updates and prepping us for the fight. Marilyn was a very efficient, sharp lawyer who monitored the euthanasia issue especially in California as it was being used by some dark operatives like the Hemlock Society against people with disabilities right to life and proper medical care. She was often doing research and writing original arguments furthering the rights of people with disabilities in their fight for survival in medicine, experimental therapies, etc. She was so busy also doing the community organizing around the issue, she did not have time to write or finish a book on the topic. But even so, her work is replete with guidance and commentary enough to be considered among the most premier that there is in the field.
