

My name is Carrie Madden and I have a significant disability known as Muscular Dystrophy. As Program Director for the ADRC, I have the opportunity to help our community members find resources and services that enable people with disabilities to live independently. Throughout my life I have greatly benefitted from programs such as: HUD housing for the disabled, COVID SNAP benefits, SSI/SSDI, Medi-cal, and several transportation services for people with disabilities. Please reach out to me and let's work together to find the resources you need to live independently in your community.
